ECOLUTION®

Special materials and coatings for ultimate corrosion-resistance and long life

Product and packaging made from recyclable materials without PVC

Packaging made from eco-friendly recycled material

Zero waste production policy at ABUS factories

Special lubricant suitable for use in food production

2

ABUS ECOLUTION® – the sustainable security solution

Innovative, corrosion-resistant coatings, high-quality materials that ensure durability, lubricants for use in the food industry, PVC-free vinyl coatings and packaging made from recycled and recyclable material – these “ingredients” provide the basis for the new ABUS **ECOLUTION®** product range.

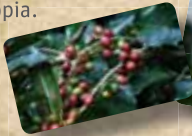

With its ecologically committed approach, security specialist, ABUS, is making a clear statement about its environmental credentials, whilst also serving the increasing demand for sustainable and environmentally friendly products.

Active environmental protection in collaboration with nature conservation organisations.

The security specialist, ABUS, is launching a new product range - **ECOLUTION®** padlocks – characterised by sustainable production methods and the use of recycled and recyclable materials.

As a further environmental benefit, ABUS is to donate 0.50 Euros for each lock sold, to nature conservation organisations and associated projects. In Germany, for example, it is supporting a NABU (The Nature and Biodiversity Conservation Union) project for rainforest conservation in Ethiopia.

There are four padlocks on special offer to begin with, the new ABUS **ECOLUTION®** range is launching four products:

The **DISKUS 24IB/70 ECOLUTION®** lock, the "Aqua" **70IB/45** lock, and the **72IB/40** and **T65AL/40 ECOLUTION®** aluminium locks.

4

DISKUS 24IB/70 ECOLUTION® - 100% Stainless Steel Protection

Designed for extreme weather conditions, these locks come with 100% stainless steel protection. The shackle, lock body and internal components are all made of high quality stainless steel, providing ultimate corrosion resistance. **DISKUS®** are key retaining to ensure lock is not left unlocked.

ABUS DISKUS® 24 – High security that cannot rust by design.

DISKUS 24IB/70 ECOLUTION®

- **Original DISKUS®** design: 360°
- Sophisticated **DISKUS®** weld seam for high break resistance
- Cylinder cover - Maximum protection against dirt an moisture
- Precision pin tumbler cylinder: With anti-pick mushroom pins
- Body, inner parts and shackle made from stainless steel for extreme corrosion resistance

6

72IB/40 ECOLUTION® - Lifelong Corrosion Resistance

Manufactured with solid aluminum body and stainless steel shackle, the padlocks of series 72 are amazingly lightweight and cannot rust by design! Their 72's chemical and corrosion resistance combined with their food-industry approved lubrication makes them the ideal solution for aggressive wash down applications. More vibrant colors allow easy lock-out customization and identification.

The **ECOLUTION®** Aluminum Padlock

721B/40 ECOLUTION®

- Aluminum body anodized inside and outside for best corrosion resistance
- Ideal for food industry use: Approved non-toxic lubrication
- Stainless steel shackle for extreme corrosion resistance
- Automatic locking for user convenience, key retaining upon request
- Perfect for laser engraving
- Precision key-retaining 6 pin cylinder for maximum key differs
- Available in keyed different, keyed alike, master keyed

8

70IB/45 ECOLUTION® - 100% Rust Protected

These solid brass locks come equipped with a vinyl covering over the shackle and lock body. This vinyl covering protects the lock from the elements while also preventing scratches or dents to the items it secures. This lock comes standard with a solid brass body and a stainless steel shackle. Even if moisture gets in, this lock will not corrode. The 5-pin cylinder is protected by a weather cap to keep dirt and debris out. With all these features standard, corrosion doesn't stand a chance. Weather sealed never rust padlock.

70IB/45 ECOLUTION® - Weather sealed never rust padlock.

70IB/45 ECOLUTION®

- Stainless steel shackle
- Inner components made from noncorrosive materials
- Shock absorbing vinyl casing, protects painted surfaces
- Sealed lock body with cylinder cover to protect cylinder from dirt
- Body and shackle insulated against electric shock
- Automatic locking for user convenience
- High precision pin tumbler cylinder
- Body made from solid brass

10

T65AL/45 ECOLUTION® - Personalize Your Lock

T65ALs are made from solid aluminum material and come with a hardened NANOPROTECT shackle making them difficult to cut. The 5-pin precision cylinder offers more unique key cuts and better tamper resistance than conventional 4-pin locks. User friendly shackles have a wide base to fit more applications. Jackets also available in different colors for better identification and protection.

T65AL/45 ECOLUTION® - This Lock is myLock!

T65AL ECOLUTION®

- Lock body of solid lightweight aluminum
- Ideal for food industry use: approved lubrication!
- NANO Protect shackle for ultimate corrosion resistance
- Made of recyclable materials
- Automatic locking for user convenience
- Precision 5 pin cylinder for maximum key differs
- Jacket protects painted surfaces
- Compact and lightweight

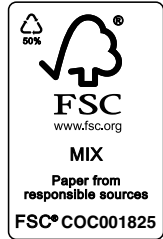

As a further environmental benefit, ABUS is to donate 0.50 Euros for each lock sold, to nature conservation organisations and associated projects. In Germany, for example, it is supporting a NABU (The Nature and Biodiversity Conservation Union) project for rainforest conservation in Ethiopia. Now covering a total area of less than 2.000 square kilometres, these forests serve as life-giving water reservoirs for the entire region.
