

# ABUS Plug & Play range

Convenient Security for the Consumer – Fast High Value Sales for the Retailer

## Webpage

On the ABUS website customers can find product information and numerous product videos. This page offers innovative product support.

- Product details available
- Product videos online
- Direct access via smartphone
- [www.abus.com/plug-and-play](http://www.abus.com/plug-and-play)

## Videos

A picture is worth a thousand words – the retail products and their features (easy installation, quick operation etc.) are best presented using motion pictures.

- All videos can be played on a standard monitor and are also available for mobile devices
- Displays the most important features and sales benefits
- Short overview regarding installation and contents

## Door monitoring

TVAC80020B

### Wireless Video Door Intercom

Wireless door intercom with integrated IR camera and portable 3.5" colour monitor.

- After pressing the doorbell images can be recorded onto an SD card. With an electric strike, the door can be remotely opened by pressing a button on the monitor.
- The existing doorbell can be utilised
- Powered by bell transformer (with integrated battery backup)
- Door Station in a weatherproof housing, protection class IP55

TVAC80000B

### Digital Door Viewer HD

The Digital HD Door Viewer offers user friendly surveillance of entrance doors. Thanks to the 2.4" colour monitor your customers can look through the door, even from a distance.

- Simple installation – either on existing spyholes or used with the included spyhole.
- Easy installation without the need for cables (batteries included)
- One push operation, view the screen and take three photographs, to be stored on a microSD card
- Keep a complete visitor history – even unwanted visitors

## Video surveillance

TVAC80010B

### Time Lapse Camera HD

No matter if your customer wants to document building projects with the Time Lapse Camera HD or is looking for a surveillance solution to capture videos triggered on motion detection – both functions are available in this ground breaking device!

- Records videos in VGA and 720P HD onto a microSD card
- Files saved in AVI video format for easy viewing on the computer
- Also suitable for outdoor use thanks to weather-proof housing, protection class IP65
- Independent standalone camera due to it being battery powered

TVIP10055B

### Network Camera WLAN

With the new VGA WLAN Compact Camera your customer can view live images from anywhere in world via app or over the internet.

- Easy wireless configuration thanks to WPS\*
- View live images on any device with internet access
- Automatic connection to the ABUS server – this service is included at no extra cost

\* WPS: Wi-Fi Protected Setup - simply press the button on the router and enter the PIN and the device automatically configures itself! (Function not available on all routers)

## Alarm/video surveillance technology
